Education

SRM Institute of Science and Technology   **India**
B. tech in Cyber Security   2022 – 2026

Skills

Ethical Hacking **|** AWS Cloud **|** Web Application Pen Test **|** Web Architect **|** Flutter **|** Burp Suite **|** Security Framework **|** Network Security **|** Python **|** Social Media Marketing **|** Meta Toolkit **|** Cloud Computing **|** SOC **|** Cloud Solution Architect

Project

MetaLib GPT:

MetaLib GPT, built with React and powered by the Gemini API, offers GPT-style conversations with rich formatting, context retention, and intuitive interactions.

VISPER:

VISPER offers a two-stage audio solution: precise, context-aware transcriptions with timestamps using an Open AI's Whisper model, followed by translation in any languages

GramEm:

GramEm is an intelligent text-enhancement tool that not only corrects grammar using a T5 transformer but also analyzes sentence emotions using a BERT-based model.

WingMan:

WingMan is an advanced AI-powered voice assistant designed to provide real-time speech recognition, language translation, and AI-generated responses using Google's Gemini API.

Xblog:

XBlog is a Flutter-based blogging application designed with an anime-inspired aesthetic and integrated with Firebase for secure user authentication.

GeoWatch Tower:

GeoWatch Tower uses behavioral data, geolocation, and machine learning to detect suspicious patterns ideal for security monitoring, bot detection, and threat analysis.
