I am pleased to submit my application for the Cloud Security Analyst or Cybersecurity Analyst role. With a strong academic background in cybersecurity, practical experience in vulnerability management, and a deep passion for securing cloud infrastructures, I am confident in my ability to contribute effectively to any organization's security initiatives.

I am currently pursuing my B.Tech in Cybersecurity at SRM Institute, where I have maintained an outstanding academic record. I have also gained hands-on experience through my internship as a Cybersecurity Analyst at EyeQ Dot Net. During my internship, I focused on Vulnerability Assessment and Penetration Testing (VAPT), Bug Hunting, and Ethical Hacking, which provided me with a deep understanding of identifying and mitigating risks in cloud environments. These experiences allowed me to implement practical security solutions and apply ethical hacking methodologies to strengthen cloud security.

In addition to my academic qualifications and internship, I have earned the Google Cybersecurity Professional Certificate, AWS Cloud Solution Architect Professional Certificate which has further enhanced my skills in areas such as threat detection, incident response, and cloud security best practices. I am well-versed in securing cloud platforms such as AWS, Azure, and Google Cloud, ensuring compliance with security frameworks and protecting against emerging threats. My passion for staying ahead of industry trends and continuously improving my skills has helped me remain up-to-date with the latest cloud security technologies and challenges.

I believe my technical expertise, problem-solving abilities, and strong attention to detail make me a great fit for both the Cloud Security Analyst and Cybersecurity Analyst roles. I am eager to apply my knowledge to help organizations enhance their security posture and safeguard critical data from cyber threats.

Thank you for considering my application. I look forward to discussing how my skills, passion, and enthusiasm for cybersecurity can benefit your organization.

Sincerely,

R Sakaeth Ram
